Skills

- Python
- LangChain
- LlamaIndex
- RAG
- Qdrant
- pgvector
- Hugging Face Transformers
- FastAPI
- prompt engineering
- RAGAS
- spaCy

Languages

- Arabic (native)
- English (fluent)

Profile

AI engineer specializing in LLM applications: retrieval-augmented generation, vector search, and evaluation. NLP background with production deployments in Arabic and English.

Experience

AI Engineer — Maktabi AI (Jan 2023 – Present)

- Built RAG chatbots over legal documents using LangChain and Qdrant, with inline citations.
- Set up RAGAS-based evaluation, raising retrieval hit-rate from 68% to 91%.
- Deployed LLM services (FastAPI) with Langfuse tracing in production.

NLP Engineer — TextLab (Feb 2021 – Dec 2022)

- Built Arabic NER pipelines with spaCy and Hugging Face Transformers.
- Fine-tuned BERT-family models for document classification (F1 0.92).

Education

BSc Computer Science, University of Jordan (2020)
