

Hassan Fares

Backend Engineer (Go) — Beirut, Lebanon (remote)

hassan.fares@example.com | +961 3 345 678

Summary

Backend engineer working in Go on high-throughput systems. Payments and streaming background; obsessive about latency budgets and clean interfaces.

Experience

Backend Engineer — Paylink *(Jun 2023 – Present)*

- Build payment-processing services in Go handling 3k transactions/second.
- Designed the idempotency layer eliminating duplicate-charge incidents.

Backend Developer — StreamCast *(Jan 2020 – May 2023)*

- Built Go microservices (gRPC) for a music-streaming platform.
- Implemented playlist sync used by 800k daily listeners.

Education

BSc Computer Science, Lebanese American University (2019)

Skills

Go, gRPC, PostgreSQL, Redis, Docker, Kubernetes, RabbitMQ, microservices

Languages

Arabic (native) · English (fluent)
