

James Okafor

Senior Site Reliability Engineer — Lagos, Nigeria (remote)

james.okafor@example.com | +234 803 456 7890

Summary

DevOps/SRE with 9 years across sysadmin, platform engineering, and reliability. Runs Kubernetes in production, automates everything with Terraform, and builds observability people actually use.

Experience

Period	Company / Role	Highlights
May 2023 – Present	Stackway Senior SRE	- Defined SLOs and error budgets for 12 services; on-call incident commander. - Built the Prometheus/Grafana observability stack used by 40 engineers.
Feb 2019 – Apr 2023	FinEdge DevOps Engineer	- Migrated workloads to Kubernetes (EKS) managed entirely with Terraform. - Cut deployment time from 45 minutes to 6 via GitHub Actions pipelines.
Jan 2017 – Jan 2019	CloudNine Hosting Systems Administrator	Managed 200+ Linux servers; wrote Ansible playbooks replacing manual runbooks.
