

Sarah Chen

Senior Backend Engineer — Beirut, Lebanon
sarah.chen@example.com | +961 70 123 456

Summary

Backend engineer with 7+ years building Python services at scale. Strong in API design, relational data modeling, and event-driven architectures. Led small teams and owns systems end-to-end, from design to on-call.

Experience

Senior Backend Engineer — CloudMed (Jan 2025 – Present)

- Own the patient-records API (FastAPI, PostgreSQL) serving 2M requests/day.
- Introduced async task pipeline with Celery and Redis, cutting report latency by 60%.

Senior Backend Engineer — TechFlow (Jul 2022 – Dec 2024)

- Broke a Django monolith into 6 microservices communicating over Kafka.
- Led a team of 4 engineers; established code review and CI standards.
- Reduced p95 API latency from 800ms to 220ms through query optimization.

Backend Engineer — DataCorp (Mar 2019 – Jun 2022)

- Built Django REST APIs for a B2B analytics product.
- Designed the PostgreSQL schema powering customer-facing dashboards.

Education

BSc Computer Science, American University of Beirut (2018)

Skills

Python, Django, FastAPI, PostgreSQL, Redis, Kafka, Celery, Docker, AWS, CI/CD

Languages

Arabic (native) · English (fluent) · French (intermediate)

Certifications

- AWS Certified Developer - Associate
